FREE Free forever! Your MO cluster is ideal for experimenting in a limited sandbox. You can upgrade to a production cluster anytime.

[Back](#) [Create Cluster](#)

Add your cluster name – any name you want to give. And click create cluster.

in this Atlas project. Granular access control can be configured with default privileges or custom roles. You can grant access to an Atlas project or organization using the corresponding [Access Manager](#).

Authentication Method

Password

Certificate

AWS IAM
(MongoDB 4.4 and up)

MongoDB uses [SCRAM](#) as its default authentication method.

Password Authentication

SHOW

Autogenerate Secure Password Copy

add user and password

go to network access -

click add IP address

Add IP Access List Entry

Atlas only allows client connections to a cluster from entries in the project's IP Access List. Each entry should either be a single IP address or a CIDR-notated range of addresses. [Learn more.](#)

ADD CURRENT IP ADDRESS ALLOW ACCESS FROM ANYWHERE

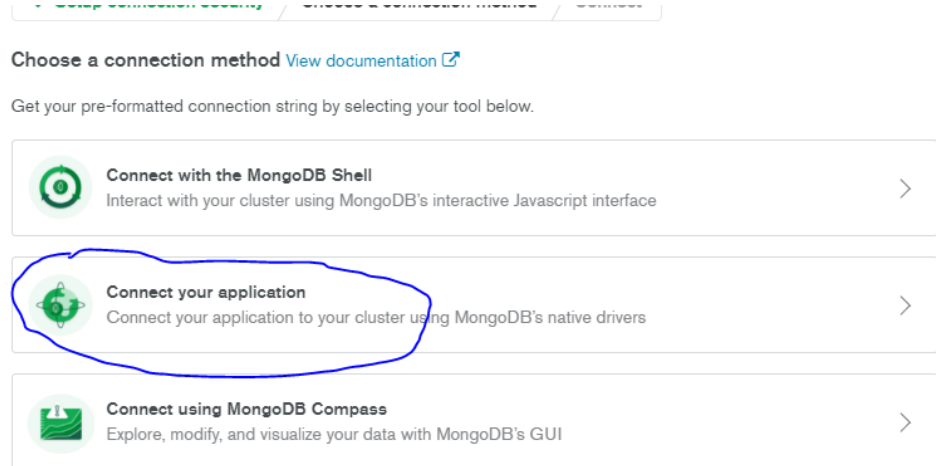

Access List Entry:

Comment:

☐ This entry is temporary and will be deleted in 6 hours Cancel Confirm

click confirm.

Click on Databases

1 Select your driver and version

DRIVER	VERSION
Node.js	4.0 or later

2 Add your connection string into your application code

☐ Include full driver code example

```
mongodb+srv://user123:<password>@cluster0.h58bs.mongodb.net/myFirstDatabase?
retryWrites=true&w=majority
```

Replace **<password>** with the password for the **user123** user. Replace **myFirstDatabase** with the name of the database that connections will use by default. Ensure any option params are [URL encoded](#).

Having trouble connecting? [View our troubleshooting documentation](#)

connect your application
click on copy icon

and paste in your project `MONGO_URL` variable inside `.env` file or `db.js` file.

Change `<password>` to password u gave in creating user, and any DB name you want in place of `myFirstDatabase`.

mongodb+srv://user123:<password>@cluster0.h58bs.mongodb.net/myFirstDatabase?retryWrites=true&w=majority

Like : -

mongodb+srv://user123:user123@cluster0.h58bs.mongodb.net/shoppingApp?retryWrites=true&w=majority

now if u run backend u will see below msg.

```
User-Pc@Lloyd-PC MINGW64 ~/Desktop/mern-shopping-yt-build
$ node backend/server.js
Server running on port 5000
MongoDB connection SUCCESS
█
```
